## **The Earthwise Group Helps Homeowners Go Green this Earth Day with Energy-Efficient Window Options**

**LIBERTY TOWNSHIP, OHIO, April 18, 2013** – On April 22, 2013, countries across the world will recognize Earth Day, an annual commemoration that focuses on environmental protection. This Earth Day, [The Earthwise Group, LLC](#), a national network of locally owned, independent manufacturers of windows and doors, is encouraging homeowners to take part in the day by evaluating the energy-efficiency of their homes, and their windows in particular. According to the ENERGY STAR website, replacing old windows with ENERGY STAR qualified windows lowers household energy bills by 7 to 15 percent, while also reducing a home’s carbon footprint.

“Replacing older windows with energy-efficient vinyl windows reduces heat gain in the summer and heat loss in the winter, helping to lower the cost of a home’s energy bills and conserve energy,” said Mark Davis, executive director, The Earthwise Group, LLC. “Earth Day is the perfect time for homeowners to evaluate their home energy costs to determine how replacing their current windows can offer significant energy savings. It also comes at a time of year when many homeowners are ready to begin remodeling or home improvement projects.”

The Earthwise Group manufactures a variety of beautifully designed, energy-efficient replacement windows, including the Earthwise Double Hung window series. With their sculpted millwork lines, Earthwise windows give homes a fresh new look, and fusion-welded sashes and mainframes help to conserve energy.

## **The Earthwise Group Helps Homeowners Go Green this Earth Day with Energy-Efficient Window Options (cont.)**

Earthwise Windows & Doors meet the highest energy standards in the industry, including those set by ENERGY STAR, the National Fenestration Rating Council (NFRC) and The American Architectural Manufacturing Association (AAMA). The Earthwise Group also recently became the first and only window and door manufacturer to be Made in USA Certified.

Currently, there are 15 Earthwise manufacturing facilities, with distribution covering the majority of the eastern half of the United States.
